Data visualization system displays organized data as multidimensional glyph with component objects color coded to represent data...

Original Titles:

Data visualization system.

Alerting Abstract ...Enables effective presentation of project management data and data relating to software release. Enables to manipulate visually recognizable glyph on the display screen to display the data item. Enables clustering of glyphs to enable comparison of data item trends over a period of time...

...DRAWINGS - The figure shows the user interface displaying 16 software glyphs corresponding to respective 16 hypothetical releases of example software project.

Title Terms.../Index Terms/Additional words: DISPLAY ;

Original Publication Data by Authority

Original Abstracts:

...each glyph includes a device for representing various data items extracted from a database as display objects, and a device for arranging the display objects as a visually recognizable glyph for presenting the data items simultaneously on a graphics display, the objects of the glyph being color coded to define a type of data and...

...data item over time. The system is interactive enabling manipulation of

the glyph on the display for visualizing a developmental state of a data item at a prior point in time.

Claims:

A data visualization system comprising : means for retrieving data representing different data items; and means for organizing said data for display as a multi-dimensional glyph having one or more component objects with an appearance resembling an insect, said component objects each...

ABSTRACT

... it is difficult to provide information about various products as a user desires.

SOLUTION: A product information management server 14 publicly releases detailed data obtained by electronizing a product instruction manual on the Internet 16. The product information management server 14 attaches an index based on the specification of each product to each piece of detailed data and displays detailed data corresponding to a specification designated...

... relations among products to one another on the basis of an index to facilitate link display to relevant products.

NUMERICAL CONTROLLER WITH ALARM DISPLAY FUNCTION

ABSTRACT

...CONSTITUTION: When a parameter for alarm display which is stored in the storage device in the controller 1 is set to a mode 'alarm display available', the controller 1 interlocks the console panel 5 so that even when the console...

... tool main body 6 does not operate and operation information is not

displayed on a display device 3; and alarm caution contents which are stored in an alarm content storage means 2 are displayed on the screen of the display device 3. At this time, characters 'confirmation' indicating a key function are displayed at the lower part of the screen at the position corresponding to a software key as a confirmation indication key 4. Then when an operator confirms the alarm caution contents displayed on the screen and presses the software key, the controller 1 detects the software key being pressed and releases the console panel 5 from being interlocked.

Title: Automatic generation of LED text display in real-time system
...Abstract: paper discusses the design principles of automatic generation of an LED (light emitting diode) text display in detail. This display is used in a certain hydropower station in its real-time announcement system for power product management information. The design scheme can be portable to other display systems if it is modified a little.
Identifiers: automatic LED text display generation...

...Abstract: software release process. They provide the basis for developing budgets, schedules, and design and testing specifications.

Changing requirements during a software release process impacts the cost, schedule, and quality of the resulting product. We have collected...

... releases in our environment to understand the source, magnitude, and effects of changing requirements on software maintenance releases. The benefits received include better management of releases and improved customer communications.

NUMERICAL CONTROLLER WITH ALARM DISPLAY FUNCTION

ABSTRACT

...CONSTITUTION: When a parameter for alarm display which is stored in the storage device in the controller 1 is set to a mode 'alarm display available', the controller 1 interlocks the console panel 5 so that even when the console...

... tool main body 6 does not operate and operation information is not displayed on a display device 3; and alarm caution contents which are

stored in an alarm content storage means 2 are displayed on the screen of the display device 3. At this time, characters 'confirmation' indicating a key function are displayed at the lower part of the screen at the position corresponding to a software key as a confirmation indication key 4. Then when an operator confirms the alarm caution contents displayed on the screen and presses the software key, the controller 1 detects the software key being pressed and releases the console panel 5 from being interlocked.

Title: Automatic generation of LED text display in real-time system

...Abstract: paper discusses the design principles of automatic generation of an LED (light emitting diode) text display in detail. This display is used in a certain hydropower station in its real-time announcement system for power product management information. The design scheme can be portable to other display systems if it is modified a little.

Identifiers: automatic LED text display generation...

...Abstract: software release process. They provide the basis for developing budgets, schedules, and design and testing specifications. Changing requirements during a software release process impacts the cost, schedule, and quality of the resulting product. We have collected...

... releases in our environment to understand the source, magnitude, and effects of changing requirements on software maintenance releases. The benefits received include better management of releases and improved customer communications.

Title: A modular approach to visualization for parallel CFD applications

Abstract: pv3 was originally designed to provide an interactive platform for the visualization of unsteady computational fluid dynamics (CFD) calculations on unstructured as well as structured meshes. It has been successfully used in cluster environments using PVM for data movement and process management. For the first pv3 releases the visualization software consisted of two parts. The client portion executes on the compute engine(s) closely coupled...

... the interactive server portion of pv3 (executing on a graphics workstation) where the rendering and display are performed. This unique architecture frees the compute engine(s) from dealing with the graphics...

Documentum And ConsenSys Software Integrate Leading Enterprise Document And Product Development Management Systems; First Off-the-Shelf Solution For Discrete Manufacturers That Melds Robust Enterprise Document Management With Product Structure And Engineering Change Management.

Business Wire, p09231016

Sept 23, 1996

TEXT:

CHICAGO--(BUSINESS WIRE)--Sept. 23, 1996--Documentum, Inc. (NASDAQ:DCTM) and ConsenSys Software Corporation today announced a partnership to integrate the Documentum Enterprise Document Management System (EDMS) with the ConsenSys RapidPDM (product development management) system.

The two companies will collaborate on developing, marketing, and jointly selling integrated off-the-shelf solutions that combine robust enterprise document management with product development management for discrete manufacturers. Until now, only custom-designed integration projects, usually out of the reach and budget of most manufacturers, have offered this level of functionality.

The first product to result from this partnership is ConsenSys Open for Documentum, an integration of ConsenSys' core product with Documentum Server. It will enable discrete manufacturers to manage their product release and engineering change process more effectively -- especially with respect to the thousands of engineering drawings, documents, parts, and assemblies that are often associated with complex products such as electronics and medical devices.

"ConsenSys has the domain expertise and field proven PDM technology that will enable us to offer a comprehensive product solution to our discrete manufacturing customers," said Jeffrey A. Miller, president and CEO of Documentum, Inc.

"A solution that combines the strength of the Documentum EDMS with ConsenSys' unique approach to PDM -- rapid deployment and ease-of-use -- will allow manufacturing companies to quickly deploy a powerful PDM application without taxing IT resources or incurring high customization costs. This is why ConsenSys Software is Documentum's first PDM Signature Partner."

"The complex document management problem faced by discrete manufacturers requires a robust repository as well as a complete PDM facility," said David Hurwitz, president and CEO of ConsenSys Software.

"Documentum provides all of the document management functionality our customers require, and we believe there is tremendous benefit in applying Documentum's powerful technologies like full-text search, distributed architecture, and compound document management to the product development management process."

EDMS Backbone Key to Global Manufacturing

Manufacturers demand an enterprise document management infrastructure to support engineering, manufacturing, marketing and customer support in multiple sites worldwide. Documentum's strategy is to provide the EDMS backbone integrated with key manufacturing applications such as CAD, PDM and ERP in order to provide the whole product solution for discrete manufacturing.

ConsenSys Open for Documentum builds on this strategy by offering PDM information like engineering change orders (ECOs) to a specific set of users in a manufacturing environment within a familiar interface. Other users in quality, marketing or customer service may access the same information through Documentum Workspace or Accelera, with web browser support.

The EDMS backbone benefits organizations by streamlining the flow of critical information throughout the entire product lifecycle.

Ed Miller, president of CIMdata, Inc. observed: "The partnership

between ConsenSys Software and Documentum enables them to offer manufacturing companies enterprise-level document management along with ECO and product structure management required within departments of companies. The partnership is highly complementary, and with good execution should provide both companies with significant new opportunities to assist manufacturing companies."

ConsenSys Open for Documentum Integrates EDMS Backbone with PDM Application

ConsenSys Open for Documentum will integrate Documentum's Docbase with ConsenSys Open, a client/server solution that automates the management, communication, and control of all product-related data and documentation.

ConsenSys will provide the PDM user interface including creation and tracking of ECOS, and will manage the bill of material (BOM) database, while the Docbase will provide the vault for storing, accessing, and controlling the engineering documents associated with specific parts and assemblies.

ConsenSys is designed to integrate easily with the customer's existing MRP system, enabling the revised BOM to be easily handed off to manufacturing once the product release or engineering change process is complete.

At the same time, a marketing manager can be notified of the new product configuration and begin work on related marketing collateral materials in another Documentum application. The result will be a complete solution for managing every aspect of the product release and change process.

ConsenSys Open for Documentum will be available from ConsenSys Software in the first quarter of 1997. The first release will support Documentum Docbase with Oracle 7 running on Sun and NT server platforms and windows clients. Other platform support is planned for subsequent releases.

About Documentum

Documentum, Inc. (<http://www.documentum.com>) develops, markets and supports a family of object-oriented, client-server document management software products that specifically address the challenges of managing intellectual capital effectively across large enterprises. Documentum is a recognized leader in the document management market.

Headquartered in Pleasanton, Calif., Documentum sells the Documentum Enterprise Document Management System through a direct sales force, systems integrators, and through affiliated distributors worldwide. Documentum has more than 150 customers in pharmaceutical, process and discrete manufacturing and engineering construction applications around the world.

About ConsenSys Software

ConsenSys Software Corporation (<http://www.consensoft.com>), founded in 1991, is a privately held software developer headquartered in San Jose, Calif. The company provides RapidPDM systems to manufacturers operating in environments of rapid product change.

The ConsenSys software streamlines product life cycles by automating document control and revisions, product release and change management, and product structure management throughout the manufacturing organization. Customers realize the benefits of shorter product cycles, reduced scrap and rework costs, and easier and less costly FDA GMP and ISO 9000 compliance.

ConsenSys systems are installed in over 60 manufacturing companies including Alcatel Comptech, Coherent Optical, Eaton, Hyundai, Ingersoll-Rand, Johnson Matthey, Multipoint Networks, Siemens Energy and Automation, Target Therapeutics, and others. -0-
